5th-Grade Stroke Lesson

Objective: Students learn about the signs of stroke using the FAST acronym. Then they will create their own pamphlet and illustrate the FAST acronym so they can share with their family members.

Materials: Students will use lots of art and craft supplies like construction paper, glitter, glue, markers, crayons, etc.

Lesson: The Lesson will begin by watching a short video on the signs of stroke and the FAST acronym. Then, using the information from the video, students will create their own pamphlet using a variety of arts and crafts supplies.

Homework: For homework, students will have to share their pamphlet with an adult member of their family and write a paragraph about their sharing experience.
