

Media Technology Class  
Stroke Awareness Video  
Grades 9-11  
Kathleen Parker  
Jessica Harris

Objectives:

- Students will be able to recognize stroke symptoms.
- Students will be able to work with equipment that is used in media technology.
- Students will be able to work cooperatively to become well-rounded individuals.

Materials:

- Video Camera
- Computers
- T.V.
- DVD Player

Lesson Plan:

1. Students will be introduced to what F.A.S.T. stands for.
2. The students will then be assigned to groups. Each group will make a public service announcement video. The video must be at least two minutes long. It must inform viewers of what F.A.S.T. stands for.
3. Each group must assign the following roles to individuals: director, writer, editor, and cameraman. (Actors do not have to be class members.)

Assessments:

Students will receive 50 points for the project.  
25 points for participation in the group activity.  
25 points for an individual grade based on participation.
