

Quick Reference Chart: Short & Long Descriptors for Therapy Functional Reporting G-codes

Please note: The information in this publication applies only to the Medicare Fee-For-Service Program (also known as Original Medicare).

The Middle Class Tax Relief and Jobs Creation Act (MCTRJCA) of 2012 amended the Social Security Act to require a claims-based data collection system for outpatient therapy services, including physical therapy (PT), occupational therapy (OT), and speech-language pathology (SLP) services.

The system collects data on beneficiary function during the course of therapy services to better understand beneficiary conditions, outcomes, and expenditures. Beneficiary function information is reported using 42 nonpayable functional G-codes and seven severity/complexity modifiers on claims for PT, OT, and SLP services.
